

Dotronix Displays are Stackable, Hangable, Kioskable and **Colorful.**

One word describes displays by Dotronix.

Versatility

Whether you need monitors stacked, ceiling mounted, or in a kiosk, we are the display of choice by retail designers. We have just made our products more versatile by offering our displays

in custom colors. By applying your corporate colors or a color that blends into the surrounding environment to Dotronix displays and matching brackets, you create a whole new look that conventional monitors cannot provide. Our slim metal cabinets house the latest in digital display technology with digitally

controlled image quality, on screen menus and addressable remote control. Ask us about our Guardian Leasing Plan. Let us help you make your retail environment look more colorful.
